There is enough pressure and
specification to make a clean cut.

Sign Boards

Material: Cardboard

Thickness: 1.5mm

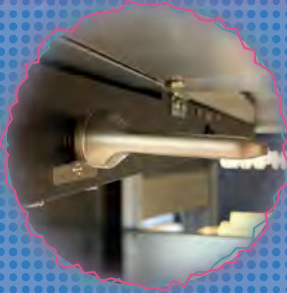

Bold creasing possible with
Creasing tool CP-002/003

Gift Boxes

Useful functions

No PC Operation

No PC is required to send the data to the plotter, the cut data is stored on a USB memory stick and can be selected from the control panel.

Copy Function

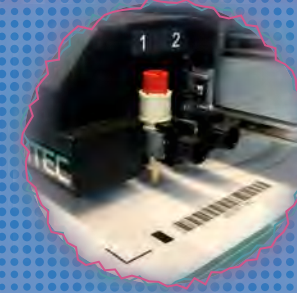

You can cut the same data as many times as you like by specifying the number of sheets in the control panel. There is also a dedicated button for this purpose.

Back Creasing

Clear folds can be made without damaging the printed surface. The number of creasing lines can be increased from the control panel.

Barcode Cut

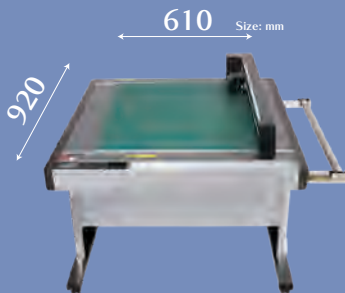

The plotter uses the barcode information to find the correct cut data from the USB memory stick and cut it. This eliminates human error.
